

## DESCRIPTION

Yuck! Step into the ATV Gross Out Lab and learn how to make a craft that will gross out you friends.

## MATERIALS

- Self-drying clay (yellow, green or beige, black)
- Buttons
- Feathers
- String
- Paint (yellow, green, olive, red)
- Scissors
- Paintbrush

## DIRECTIONS

1. Take some beige self-drying clay and roll it into a little column.
2. Mix in different colors of clay. Take little bits of black and yellow clay, roll them into thin strips, and wrap them around your beige column.
3. Squish the clay together to spread the colors throughout it.
4. Add your green clay using the same technique you used for the other colors, rolling it out, wrapping it, and then squishing it into the rest of the clay. Try not to mix the clay together too much or it could all turn into the same color. You can always mix in more clay if you'd like. While mixing the colors, try molding it to a lumpy puddle.
5. Once you have your puddle of throw-up molded the way you like it, it's time to add some things for texture. Stick some buttons, feathers, and frayed bits of string throughout the puddle. Be sure to secure them into the clay so that when it dries, they'll stay attached.
6. Use different colors of paint to add a little extra color to the completed puddle. Olives, greens, and yellows all work well. Let the paint and clay dry and get ready to gross out everybody!
