

DESCRIPTION

Take off from the ATV garage with this foam airplane. This plane is the passport to first class fun.

MATERIALS

- Two Styrofoam plates
- X-acto knife
- Scissors
- Colored markers
- Paper clip
- Plane template

DIRECTIONS

1. Print out the plane template and cut out the patterns for the body and wings of the plane.
2. Trace your body pattern onto one Styrofoam plate and the wing pattern onto the other.
3. With an adult helper, use an X-acto knife to cut a slot for the wings into the body of the plane.
4. Cut both of your shapes out of the plates. Take your time so you don't rip them.
5. Use your markers to decorate your plane pieces. You can even use stickers if you want.
6. Assemble the plane by carefully inserting the wings through the slot in the body.
7. Add a paper clip to the front of the airplane to give it more weight and help it fly better.
