

DESCRIPTION

Join Dave Jadico in the Activity TV Gross Out Lab as he shows you how to make a squeeze ball! Create a goofy face and watch it distort as you squeeze the cornstarch-filled balloon!

MATERIALS

- One latex balloon
- Cornstarch
- Permanent markers
- One small funnel

DIRECTIONS

1. Take a large balloon and blow it up to stretch it out a bit. Let it sit for a bit and then let out the air.
2. Once your balloon is all stretched out, stick a funnel into the opening and pour some cornstarch through the funnel into it. You don't need too much, just enough to fill the deflated balloon. Tap down on the funnel to let the starch fall all of the way into the balloon.
3. Remove the funnel and tie a knot into the opening of the balloon to seal in the cornstarch.
4. Time to decorate the balloon. Use markers to draw a scary monster face onto it.
5. Let the marker dry for about ten minutes and then give the balloon a good squeeze to make your monster face bulge out!
