

## DESCRIPTION

Get your gobble on this holiday with a Thanksgiving Hand print Turkey!

## MATERIALS

- gold paint
- glue
- scissors
- construction paper
- paintbrush
- plastic plate
- white paper
- black marker
- red, yellow, orange and green pipe cleaner
- googly eye
- feather

## DIRECTIONS

1. Paint the palm of your hand with gold paint and press hand print down on a sheet of construction paper.
2. Glue on a googly eye to the turkey's head (your thumbprint).
3. Use a red feather as a wing, or you can paint a wing on.
4. Cut about 2 inches off a yellow pipe cleaner. Bend it over twice and separate it to create a beak. Glue it on.
5. Add a giblest by cutting red pipe cleaner about an inch long. Bend it and curl the ends up.
6. For the legs, cut two pieces of orange pipe cleaner in equal length. Make an L shape and curve the bottom of it around for a foot. Glue the legs to your turkey.
7. Create some grass using green pipe cleaner. Bend it back and forth into a zigzag pattern and glue it down near his feet.
8. To create a thought bubble, cut a white piece of paper into a circle. When you get almost the way around, stop and make a little triangle. Glue it down. Take a black marker and write "Happy Turkey Day" or something else festive.
