

DESCRIPTION

If you love wearing jewelry then grab some glue and felt and create this incredible initial bracelet!

MATERIALS

- black stick-it felt
- cord
- assorted gems
- scissors
- marker
- glue

DIRECTIONS

1. Draw the first letter of your name on the back side of a piece of Stick-It felt. Trace around the letter, creating a wide border.
2. Cut out the letter, turn it over, and trace the opposite side of the letter onto the back of the same piece of Stick-It felt. Cut it out and lie both letters felt side up on the table. You should now have two letters. One letter should look normal and the other should look backwards!
3. Cut a piece of cord 1 inch long. Peel the paper back off the backwards letter and stick half of the cord to the letter. Loop the cord around. You should now have a small loop at the top of your letter!
4. Peel the paper back off of the normal facing letter and stick the two letters together! Make sure the letters are lined up before you stick them. Once they're stuck...they're stuck for good! Trim around the edges.
5. Glue assorted gems onto your letter. Then cut a cord 2.5 inches long and fold in half. Slip the folded end through the loop at the top of your letter.
6. Take the loose ends of your cord and thread them through the folded end of your cord.
7. Pull tight!
