

DESCRIPTION

This ring is so cool it will send you into orbit. All you need are paint and glue to get you started on this fun craft!

MATERIALS

- 2 inch wooden circle
- blue paint
- 1 sheet green sticky felt
- 1 sheet black sticky felt
- 1 green pipe cleaner
- scissors
- marker
- paper plate
- paint brush
- pencil

DIRECTIONS

1. Take a 2 inch wood circle and paint it blue then let it dry.
2. Print out and trace the land mass templates onto the back side of your green Sticky felt. Be sure to trace the templates backwards. When you flip the felt over, the world will look right again! Cut the template out and stick it on the dry wooden circle.
3. Cut the template out and stick it on the dry wooden circle. Trace your wooden circle onto a piece of black Sticky felt. Then cut it out. Carefully poke two holes in the center of the black circle.
4. With the paper backing still on, poke a pipe cleaner through both holes. Then tear away the paper.
5. Stick the black circle to your wooden earth. Twist the ends of the pipe cleaners together to shape a ring.
