

## DESCRIPTION

Get ready to learn a simple magic effect with a couple of paper clips and a dollar bill.

## MATERIALS

- two paper clips
- dollar bill

## DIRECTIONS

1. Fold the dollar bill into a Z formation. To do this, fold two thirds of the dollar to the right, and then fold the top third back to the left. If you look at this from the side it'll look like a Z.
2. Place the paper clips inside the Z so that one is holding the top of the Z together and the other is holding the bottom of the Z together. There should be about 1 inch of space between the clips and the ends of the Z should be protruding so that you can grab them later.
3. Hold the ends of the Z and carefully pull them apart... the clips will get closer and closer. Give the dollar bill a firm tug and the two paper clips will link together!
