

DESCRIPTION

Want to learn how to make a grape magically disappear? Let Ryan Oakes show you how in this mystical Mouth Magic trick!

MATERIALS

- two grapes

DIRECTIONS

1. Keep one grape in your mouth. Pick up the other grape and show it in your right hand.
2. Do a false transfer to the other hand. To do this, pretend to put it in your left hand, but actually clip it between your thumb and index finger.
3. Bring your left arm casually to your side, but lead the audience's eyes to your right hand as you bring it up to the side of your face.
4. Now lightly smack your right hand against your right cheek. At the same time you open your hand to show that the grape is now gone, open your mouth slightly and let the hidden grape come into view!
