

DESCRIPTION

Want to learn how to make a dollar bill magically flip upside down? Ryan Oakes will show you how!

MATERIALS

- a crisp dollar bill

DIRECTIONS

1. Hold the bill on each side with both hands. The face of the bill should be facing the audience and right side up.
2. Fold the bill vertically in the middle from right to left, closing the face of the bill inside.
3. Now, fold it in half horizontally, bringing the top of the bill down to the bottom. Snap your fingers.
4. Open the first fold by bringing the flap closest to you upwards.
5. Open the second fold by bringing the flap furthest from you back around to the right. Now George will be upside down! It's that simple!
