

DESCRIPTION

Transform your ordinary water glasses into beautiful musical instruments! Join musician Dave Jadico as he teaches you step by step how to decorate and tune a water glass!

MATERIALS

- Popsicle sticks
- 6 Drinking glasses
- Pitcher of water
- Food coloring
- Colorful stickers

DIRECTIONS

1. Tune your glasses by pouring a different amount of water into each glass. More water in the glass means a lower pitch when you tap on it. Tap on them with one of your Popsicle sticks as you pour to know when you have the right pitch for each.
2. Decorate your glasses with stickers to jazz them up a bit.
3. Add different food coloring to the water in each glass in order to color code your notes.
4. Play songs on your glasses by tapping on the tops of each glass with your Popsicle sticks.
