

DESCRIPTION

Build your very own house...out of sand! Just grab your beach bucket and shovel and get ready to have some fun in the sun!

MATERIALS

- two 5 gallon buckets (one bottomless)
- shovel
- 2 different spatulas
- knife
- spoon
- water
- sand

DIRECTIONS

1. Pour sand into your bottomless bucket. Fill it halfway with sand while slowly adding water, and pack it down. Use a spatula to tap around the edges of the bucket before sliding the bucket off.
2. Make a square shape on top and cut sides with your spatula. Make a line going down the center of the roof and cut diagonally to create an angled roof.
3. Cut out a chimney using a knife, and carve out windows and a door with your spoon.
4. Finally, mix water and sand in bucket and use your hand to create "drip trees" around the house.
