

SUMMER FUN

SANDCASTLE MOAT & BRIDGE

www.activitytv.com

DESCRIPTION

Get ready to protect your castle with an awesome moat and bridge. Just grab a shovel and some water and you'll be ready to build. You'll need the basic sandcastle formation to get started!

MATERIALS

- bucket
- shovel
- spatula
- knife
- water
- sand

DIRECTIONS

1. Dig a trench around most of the castle. Cut out sides for a bridge.
2. Carve out a road on top and create edges. Make 2 little towers with wet sand on either side.
3. Carve out one to three holes - three smaller holes are better - so water goes through. Fill the moat with water!
